

Majestic Natural Vent Gas Fireplace

Fireplace Only

Standard Features

- Extra tall and wide dimensions for expansive fire viewing.
- Traditional tapered Firebox sides provide greater reflection of radiant heat.
- Heat-Circulating (NVBC42) model.
- Firebox is fully lined with durable refractory with realistic brick pattern.
- Maximum Input: 30,000 BTU/hour.
- Wall Switch Kit for convenient on/off operation.
- Black Wire Mesh Fire screen for added safety assurance.
- Realistic flame pattern with hearty front burn and glowing embers.
- Nearly invisible air intake (no unsightly slots, holes or gaps). Attractive, realistic ceramic fiber log set.
- Factory-installed connection for Outside Air System provides constant flow of combustion air to firebox for tightly sealed homes. Venting and termination sold separately.
- Design certified by American Gas Association and Canadian Gas Association.
- Limited Warranty and 30-Year Protection Plan assure quality and dependability.
